

## **Searching...**

We are looking for a design engineer with experience in road design and all associated infrastructure elements.

## **Must-have**

A sound and proved knowledge in infrastructure design, especially in roads and highways.

Good communication skills and team spirit combined with a constant willingness to learn must complete the technical expertise.

Good command of English language.

Professional approach to time, costs and deadlines.

## **We appreciate**

BIM knowledge, CAD software knowledge, preferably Autodesk Civil 3D and/or Autodesk Revit

Ability to communicate in any other foreign language.

Availability to travel abroad on projects purposes.

Any programming skills.

## **We offer**

When you join Splendid Development, you become part of a team that encourages growth, flexibility and creativity. We believe in each person's potential, and we'll help you reach yours.

You will be involved in iconic Infrastructure projects across Europe, working with multidisciplinary teams of engineers, architects, analysts, programmers and artists using the latest technologies for delivering an outstanding outcome.

All our projects are made in BIM environment and you will receive full support to acquire the right knowledge and to explore any related development opportunities. Integration program with training and ramp-up plan supported by an assigned mentor.

The chance to work abroad, for defined period of time in multinational teams and international work environment.

We want to keep our colleagues close to each other and, because of that, we appreciate if you can work from our office in Iasi with a flexible program. Working from distance is also an option we can speak about.

We want to make your experience with us more enjoyable, which is why we will provide a competitive, performance-based salary and an extensive benefits package.

## **Our expectations after induction period**

Full responsibility for interpreting, organizing, executing, and coordinating technical assignments.

Ability to work under minimal supervision. Supervision received is essentially administrative with assignments given in terms of broad general objectives.

Involvement in all design process from concept to "as-built"

Technical solution and support for all members of design team.

Mastering Autodesk Civil 3D or Autodesk Revit software and strong knowledge of BIM environment and workflows used in Splendid Development.

Proactive approach to research and development in all related areas.

Maintain liaison with teams and individuals within the organization and outside of the organization.
